

TECHNICAL

PART 8 - Training of ACP Personnel

Training Plans. Tenderers shall prepare a draft of the Operations and maintenance/repair training plans to be fully developed and implemented under the terms of the Contract. The draft shall address proposed classroom instruction and on-the-job training to be implemented to effectively train the Employer's Operations and maintenance/repair staff in the upkeep and repair of the Plant to be completed under the Contract. Included within the plan shall be an ordinal programme addressing when and where the training will be conducted during the course of commissioning the lock complexes. The plan shall also identify the role and function of technical support staff from manufacturers, vendors, systems fabricators, and consultants, as appropriate to ensure the full and proper training of the Employer's Operations and maintenance/repair staff. The plan narrative shall be presented in no more than 2,000 words.
